

Investment Philosophy

The Fund's investment objective is to provide long-term total investment returns with moderate risk through a combination of long-term capital growth and current income.

The Fund invests primarily in common and preferred shares of large and mid-capitalization Canadian companies, Canadian federal and provincial bonds, Canadian corporate bonds rated A- or better by DBRS Limited and high quality money market instruments.

The Portfolio Manager uses a disciplined investment process which takes the entire investment universe and narrows investment options to only companies with market leadership, quality management and excellent businesses.

Portfolio Manager Commentary

by William C. Wolfenden, MBA, CFA
Chief Investment Officer,
Doherty & Associates Investment Counsel, Ottawa, ON
Lead Portfolio Manager for the Brigata Canadian Balanced Fund

For the three month period ending June 30, 2011 the Brigata Canadian Balanced Fund Series A units declined 3.0 %, compared to the 60% S&P/TSX Composite Index (-5.15%), 35% PC Bond Index (2.48%), 5% PC Bond 91-Day Treasury Bill Index (0.24%) blended benchmark, which declined 2.21% for the period.

The equity/fixed income ratio of the Fund at June 30, 2011, was 68.7% equity, 30.5% fixed income (including 9.7% of preferred shares) and 0.8 % cash equivalents. The equity portion of the portfolio was 86.4% in Canadian securities and 13.6% in foreign securities (9.3% of the total portfolio). The foreign holdings are up from 7.4% at year end 2010 as we continue to take advantage of the strong Canadian dollar to diversify into solid, non-Canadian multinational firms.

The top equity holdings as June 30, 2011 were TD Bank, Royal Bank of Canada, Suncor Energy, Rogers Communications, Johnson and Johnson, Bank of Montreal, Talisman Energy, Manulife Financial, Power Corp. and TransCanada Corp. Our largest foreign holdings were Johnson and Johnson, CVS Caremark, Cisco Systems, Vodafone Group and Novartis AG.

The bond portfolio had a corporate bond weighting of 71.6%, with all securities rated A- or better by DBRS.

The Fund's equity sector weightings include an overweight position in Financials, Energy and Telecommunication Services and an underweight position in Materials. The overweight position in Energy hurt relative performance this quarter, offset somewhat by our underweight position in Materials. We believe that oil focused Canadian energy companies are presently particularly attractive given our long term outlook and the potential for supply disruptions.

Our bond holdings are all rated A- or better. We continue to have an overweight exposure to high quality corporate bonds. The overall duration of the fixed income portfolio is below the benchmark as we feel long term bond yields are not being adequately compensated for the risk of higher interest rates. This hurt relative performance this quarter as long term bonds were up 3.89%
